DESCRIPTORS	*Blue Collar Occupations; *Employment Patterns; *Employment Statistics; Federal Government; *Government Employees; Manpower Utilization; Occupational Clusters; *Occupational Information; Tables (Data)

ABSTRACT

The booklet presents the results of the Civil Service Commission's survey of full-time Federal civilian employment as of October 31, 1970. Personnel were reported in almost 1,400 separate occupations and combined into 53 specific job family groups and a "Miscellaneous Occupations" job family. The blue-collar employees made up slightly over 22% of the total full-time work force and nearly all were stationed in the U.S. The number of personnel in blue-collar positions has decreased each year since 1957 (excluding 1961 and 1966), cutbacks in the Department of Defense being responsible for the net loss. The specific tables compiled are: full-time blue collar employment by a) agency and geographic area; b) occupational family, geographic area, and sex; c) occupational family, sex, and supervisory positions; occupational distribution of full-time blue-collar employees by selected agency; comparison of full-time blue-collar employment by major occupational groups and geographic area, 1965-1968-1970; and trend of Federal full-time blue-collar employed by major occupational groups. OCCUPATIONS OF FEDERAL BLUE-COLLAR WORKERS

1970

INTRODUCTION

This publication, the sixth edition of Occupations of Federal Blue-Collar Workers published by the Civil Service Commission, presents the results of the Commission's survey of full-time civilian employment as of October 31, 1970. The five previous editions, pamphlets 59, 59-1, 59-2, 59-3, and 59-4 presented survey results as of February 28, 1957, and October 31, 1958, 1960, 1966 and 1968, respectively. An earlier publication by the Bureau of Labor Statistics was Occupations and Salaries in Federal Employment, Monthly Labor Review, January 1941. In addition, the Bureau of Labor Statistics has published data from surveys taken in 1959, 1961, 1962, and 1965.

COVERAGE

The 1970 data presented in this publication encompass the full perspective of world-wide blue-collar (Wage System) employment. Excluded are employees of the Board of Governors of the Federal Reserve System, the Central Intelligence Agency, the National Security Agency, Members and employees of the Congress, and foreign nationals employed overseas.

PRESENTATION AND UTILIZATION OF DATA

Occupational family groups and occupational series within familes, are those found in the Handbook of Blue-Collar Occupational Families and Series, published by the Civil Service Commission.

Personnel were reported in almost 1,400 separate occupations and combined into 53 specific job family groups and a "Miscellaneous Occupations" job family. Job families varied in size from 60,654 in the Manual Labor Occupations (11 percent of the total number of employees reported) to 3 in Plastic Material Manufacturing.

As of October 31, 1970, 2,556,650 full-time employees were reported by over 100 Federal agencies. Blue-collar employees, representing 62 Departments and agencies, made up slightly over 22% (or 574,928) of the total full-time workforce. Almost 85% of the total blue-collar workforce was employed by the following three agencies: Defense (416,557); Post Office (36,426); and Veterans Administration (32,710).

Nearly all blue-collar workers were stationed in the United States, 566,314 of the 574,928 world-wide. Less than 7% (39,329) of those located in the United States were reported in the Washington, D.C. metropolitan area.

There were 8,614 U. S. citizens in blue-collar positions in U. S. territories and foreign countries at the end of October 1970.

In addition to the occupational inventory, agencies were requested to identify those personnel in Supervisory (or Leader) positions, as provided for in the Handbook of Blue-Collar Occupational Families and Series. While total blue-collar employment decreased by 8.5% (53,259) from October 1968 to 1970, the number of supervisory personnel decreased by 25.5% (from 92,983 to 69,277). Of these supervisors, 67,082 were men, compared with 90,419 in 1968.

The number of personnel in blue-collar positions has decreased each year since 1957 (excluding 1961 and 1966). During those two years, when employment increases were reported, there were numerous changes in coding and titling of blue-collar occupations. Since 1966, blue-collar employment has declined by 54,328. Cutbacks in the Department of Defense totaling 59,142 were responsible for the net loss.

Table E provides a trend of employment by major occupational job family groups from 1958 through 1970. For the purposes of this table all occupational jobs families have been consolidated into 31 major job family groups and an "All Other, Not Elsewhere Classified" category.
